| GH Fellowship Training  
(general or embedded in a subspecialty fellowship; refer to [Chapter 8](#)) | Formal GH training can be achieved in both general or subspecialty-focused GH fellowship programs.  
General fellowships are usually 2 years and can be paired with another degree, such as a master's in public health.  
Subspecialty experiences include protected time abroad for clinical or research experiences. | ▪ General Pediatric GH Fellowship  
▪ Subspecialty Fellowship with GH Training

| Clinical GH Work - NGOs                                    | Several NGOs hire board-certified pediatricians for clinical work abroad. These positions usually require at least a 6- to 12-month commitment.                                                             | ▪ Partners in Health  
▪ Médicins Sans Frontières ("Doctors Without Borders")  
▪ Seed Global Health  
▪ Faith-based NGOs  
▪ Indian Health Service                                                                                                                                                                |
| Clinical Work Abroad - Academic Affiliated                 | Several medical schools are involved in international workforce capacity building projects abroad and hire pediatricians to work clinically.                                                               | ▪ Baylor International Pediatric Aids Initiative (BIPAI)  
▪ Texas Children's Global Health Corps  
▪ Human Resources for Health - Rwanda  
▪ Health Workforce Program - Liberia                                                                                                                                                     |
| Policy Work and/or Public Health                           | Internships at national or international policy organizations are a potential gateway to careers in these organizations.                                                                               | ▪ World Health Organization  
▪ CDC  
▪ UNICEF  
▪ CDC EIS program                                                                                                                                                                         |
| Research                                                   | Opportunities that fund GH-related research training.                                                                                                                                                      | ▪ NIH K awards  
▪ Fogarty Research                                                                                                                                                                          |
| Academics                                                  | Scholarly networks of educators and researchers can be found in several national organizations.                                                                                                       | ▪ [Association of Pediatric Program Directors Global Health Learning Community](https://www.appdb.org)
