

ABP Corporate Policy

Continuing Certification Requirements for ABP Appointees

ABP diplomates appointed to ABP board of directors, committees, subspecialty boards, or task forces must hold current certification in either general pediatrics or a subspecialty and must meet the requirements for Continuing Certification (previously referred to as Maintenance of Certification or MOC) throughout the term of appointment. Specific requirements will depend on the end date of their current continuing certification cycle, and are available on each individual's personal portfolio. Appointees who are members of a subboard must maintain certification in their subspecialty.

Since ABP Appointees are required by virtue of their participation in ABP activities to complete all requirements for continuing certification, Appointees will be defaulted to the Annual Payment Option, and their fee will be waived for each year an individual is actively serving on a committee, subboard, or task force. This waiver applies to all certifications held by an Appointee.
